

College Usage for Professors Teaching our Future Teachers

- 1) Using the college/university passcode, each professor teaching our future teachers may create their own account on Streamline. Contact ETV to receive that passcode.
- 2) Using the college/university passcode, each professor teaching our future teachers may create a generic account for each of their classes that will be using Streamline.
 - ✓ All students will use that one account.
 - ✓ Please change the password at the start of each semester.
 - ✓ The students may want to create a folder under My Content to save list of video clips, assignments and other items they use that term within Streamline.
- 3) When a student begins to student teach, they may request the passcode through the Media Specialist at that school to create their own individual account on Streamline. That account should have an “end date” on it corresponding to when they complete their student teaching.
- 4) When the new teacher arrives at their new school and it is within South Carolina, if they had an individual account, contact ETV to have that account transferred to their new school.
