

Fictitious Bird Adaptable to Habitat

Assignment: Be creative. Draw a bird with adaptations to meet the habitat of its environment. Then design a habitat suitable for the bird you have drawn.

- The bird is a flightless carnivore that swims.
- It captures its prey with its feet but also finds food with its beak.
- It spends most of its time in fresh water.
- It feeds only on freshwater snails and frogs.
- It lays eggs in a nest on the shoreline.
- The male defends the nest.
