

Family Disaster Plan for

_____’s Family

You should talk to your family about:

- Where to meet away from your home in case of a fire (like a neighbor’s house or the corner of the street).

Our family will meet at _____

- Where to go in case of a tornado or hurricane. (basement, interior room or hallway, on lowest floor, under sturdy furniture)

Our family will go _____

- Where to meet outside your neighborhood if you must evacuate (leave). Know streets, highways and location of higher ground. You should pick a friend or relative’s house.

Our family will meet at _____

- Where to call to “check in” if you become separated from your family during a disaster. You should memorize the phone number of a favorite aunt or family member who lives in another state. You would call there to report where you are so your family can find you.

Name of person to call: _____

Phone Number to memorize: _____

Other things to do:

1. Be sure your house has a smoke detector and remember to change the batteries twice a year. It’s also a good idea to take a first aid class so you will be prepared to help others.
2. Have a NOAA weather radio with a warning alarm or listen to radio and television for information.
3. Have drills often so every member of the family knows what to do.
4. Stay away from windows, out of automobiles and mobile homes.
